Permissible Deviations for Class A and Class B Platinum Sensors

The permissible deviations for platinum resistance elements (uncalibrated) are determined by the following equations (in accordance with DIN IEC 751):

Permissible Deviation – Class A $^{\circ}$ C = $\pm (0.15 + 0.002 [t]$

Permissible Deviation – Class B $^{\circ}$ C = $\pm (0.3 + 0.005 [t]$

Where [t] is the temperature value in °C.
